PRESS RELEASE

VISCOFAN INCREASE THE CAPACITY OF ITS COGENERATION PLANT IN SPAIN

- With a total capacity of 44.7 MW, it consolidates its co-generation plant in Navarre (Spain).
- The Project involves 14 million of Euros on capex, one third of the total capex of the Group in the current fiscal year, and completes the 11 million Euros invested in 2008 in the first increase of the capacity of the co-generation plant.

Pamplona, July 20th, 2009. Viscofan has started its last increase of the new cogeneration plant in its Cáseda's facility (Navarre), with the installation of two new engines of 8.3 MW each, reaching a total power capacity of 44.7MW.

The second phase of the capacity increase has been completed in just 13 months. The project involves an investment of 14 million Euros, and includes the installation of the aforementioned two engines, a new high-tension cable and additional works to overcome the problems of capacity in Sangüesa's substation.

Viscofan has devoted more than 25 million of Euros to increase the cogeneration plant during the period 2007-2009.

With this new increase of capacity, the worldwide artificial casing leader consolidates a new business line based on the sale of electricity coming from the cogeneration plant in Navarre. At current prices it could imply around 25 million of Euros of revenues per year.

About Viscofan:
Viscofan is the worldwide leader manufacturer of meat casings, and the unique provider that produce all meat casing family products.
